West Japan Railway Company

Flash Report (Consolidated and Non-Consolidated Basis)

Results for the year ended March 31, 2010

Forward-Looking Statements

This release contains forward-looking statements that are based on JR-West's current expectations, assumptions, estimates and projections about its business, industry, and capital markets around the world.

These forward-looking statements are subject to various risks and uncertainties. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "may" "will" "expect" "anticipate" "plan" or similar words. These statements discuss future expectations, identify strategies, contain projections of results of operations or of JR-West's financial condition, or state other forward-looking information.

Known or unknown risks, uncertainties and other factors could cause the actual results to differ materially from those contained in any forward-looking statements. JR-West cannot promise that the expectations expressed in these forward-looking statements will turn out to be correct. JR-West's actual results could be materially different from and worse than expectations.

Important risks and factors that could cause actual results to be materially different from expectations include, but are not limited to:

- expenses, liability, loss of revenue or adverse publicity associated with property or casualty losses;
- · economic downturn, deflation and population decreases;
- adverse changes in laws, regulations and government policies in Japan;
- service improvements, price reductions and other strategies undertaken by competitors such as passenger railway and airlines companies;
- infectious disease outbreak and epidemic;
- · earthquake and other natural disaster risks; and
- failure of computer telecommunications systems disrupting railway or other operations

All forward-looking statements in this release are made as of April 28, 2010 based on information available to JR-West as of the date April 28, 2010 and JR-West does not undertake to update or revise any of its forward-looking statements or reflect future events or circumstances.

QUALITATIVE INFORMATION RELATED TO BUSINESS PERFORMANCE AND FINANCIAL STATEMENTS

1. BUSINESS PERFORMANCE

1. Analysis of Business Performance

(1) Overview of Results for the Subject Period

On April 25, 2005, JR-West caused an extremely serious accident when one of its trains derailed between Tsukaguchi and Amagasaki stations on the Fukuchiyama Line, resulting in 106 fatalities and more than 500 injuries of passengers. Since the accident JR-West has exerted its full effort toward pursuing the three pillars of its management to support the bereaved families and all those who were victims of the accident, pursue safety improvement measures, and reform its corporate culture. We have also humbly accepted the report on the Fukuchiyama Line accident released by the Aircraft and Railway Accidents Investigation Commission in June 2007, and are working to make improvements by sincerely and quickly addressing its proposals, opinions and other issues raised.

During the subject fiscal year (April 1, 2009 to March 31, 2010), JR-West held a memorial service for the victims of the Fukuchiyama Line accident, and continued to make a concerted effort to the families of the victims, including convening in August 2009 an explanatory meeting regarding the accident and our response. Further, in consideration of the Fukuchiyama Line accident, in April 2009 we established the JR West Anshin Foundation with the aim of fostering a safe and secure society. The foundation was certified as a public interest group in January 2010.

JR-West also worked to achieve the goal of its five-year Medium-Term Management Plan, formulated in May 2008. Under this plan, in accordance with the Corporate Philosophy and Safety Charter adopted in March 2006, we will establish "a corporate culture that places top priority on safety," make further improvements in safety and regain customer trust, building on this foundation to achieve sustainable growth into the future. In particular, as part of our measures to address the most essential issue of improving safety, we have incorporated the Basic Safety Plan at the heart of the Medium-Term Management Plan. Working to "Build a corporate system to ensure no accidents to produce causalities among our customers and no serious labor accidents to our employees," we have established a safety management system based on risk assessment, and implemented a range of other measures.

As part of its reform effort, JR-West also established and is implementing a range of measures that cover everything from raising awareness to general operations, based on the recommendations of an Advisory Panel for reform of corporate culture made up of experts from outside the Company.

In June 2009, JR-West put in place a structure to steadily implement the Basic Safety Plan, established the new position of Technical Director as a means of continually support improvements in the technological capabilities that underpin safety, and took other steps to further enhance the management foundation. We have also sincerely heeded the reprimand from the Kobe District Public Prosecutors Office regarding the Fukuchiyama Line accident, implementing a new management structure in August 2009, and putting in place a structure to thoroughly support the three pillars of our management efforts.

In response to the serious compliance issues raised during the investigation of the Fukuchiyama Line accident conducted by the Aircraft and Railway Accidents Investigation Commission, in September 2009 JR-West was ordered by the Minister of Land, Infrastructure, Transport and Tourism to submit a report on reoccurrence prevention and other improvement measures implemented based on an examination of the current situation and the results. In November JR-West compiled a report on reoccurrence prevention and other improvement measures, along with the results of the investigation conducted by a Special Committee on Compliance made up of experts from outside the Company, along with an in-house team under the direction of the president. This report was submitted to the Minister of Land, Infrastructure, Transport and Tourism, and JR-West continues to make a concerted effort to prevent a reoccurrence and achieve corporate revitalization.

Specifically, in December JR-West established a Corporate Revival Headquarters to provide for the quick and steady implementation of these measures, as well as a Corporate Ethics and Risk Management Department to coordinate all compliance functions. In February, the Corporate Ethics Committee was established as a consultative body for the Board of Directors, and makes deliberations on such matters as policies to establish corporate ethics. We also formulated a "Code of Conduct for Directors" and selection criteria for directors and other officers, in order to ensure adherence to corporate ethics based on a strong ethical viewpoint and sense of responsibility among directors. For everyone affected by the Fukuchiyama Line accident, JR-West held explanatory meetings in October and December 2009.

The business environment for JR-West was very challenging, with the sluggish Japanese economy compounded by deep discounts for expressway tolls, the spread of the new influenza virus in the first half of the subject fiscal year, and other issues. Faced with these conditions, with the aim of long-term improvements in its corporate value, JR-West has devoted its full effort to enhancing safety in its mainstay railway business, while also working to improve the value of our railway belts, by developing a variety of measures that draw on the unique characteristics of each of its businesses, including other Group operations, and effectively utilizing their assets. We also developed various marketing strategies to stimulate travel demand, worked to secure earnings, and under the Management Improvement Headquarters established in March 2009, revised the entire business operating structure to strengthen management foundations.

Nevertheless, consolidated operating revenues for the subject fiscal year (April 1, 2009 to March 31, 2010) declined from the same period of the previous fiscal year, down 6.7% to $$\pm 1,190.1$$ billion. Operating income was down 37.5% from a year earlier to $$\pm 76.5$ billion, recurring profit fell $$\pm 9.3\%$ to $$\pm 48.1$ billion, and net income was down 54.4% to $$\pm 24.8$ billion.

(2) Results by Business Segment

Transportation Operations

In the railway business, JR-West continued to pursue improvement measures that reflected the remarks, including the proposals and opinions, noted in the investigation report on the Fukuchiyama Line accident. Further, to help "build a corporate system to ensure no accidents to produce causalities among our customers and no serious labor accidents to our employees" in

accordance with the Basic Safety Plan formulated in April 2008, we moved forward with and worked to establish risk assessment measures. We also continued with such measures as convening regular safety meetings to allow top management and officers on the one hand, and employees in the field on the other, to directly exchange opinions.

In terms of facilities, along with expansion of the ATS-P system, JR-West took additional steps that included enhancing the safety of crossings, strengthening pillars supporting elevated tracks against earthquakes, and increasing the number of seismometers. Further, taking to heart the seriousness of accidents now and in the future, from April 2009 we expanded to all JR-West Group employees the safety training session conducted at the Railway Safety Education Center, established to teach systematically the lessons learned from accidents. Various types of training sessions were also conducted on caring for passengers and improved response in the event of an accident.

In transportation operations, JR-West worked to enhance convenience with measures that included revisions to the timetable in March, and upgrades to all *Nozomi* trains on the Sanyo Shinkansen between Tokyo and Hakata to N700 models. For conventional lines, we introduced new rolling stock for the limited express train *Thunderbird*, increased the number of rapid trains on the Sagano Line between Kyoto and Sonobe following completion of a double track along that segment, and in June 2009 increased the number of *Hakutaka* limited express trains operating between Kanazawa and Echigoyuzawa stations.

In October 2009 JR-West began using a new traffic control system on the Osaka Loop Line, Yamatoji Line and other networks in an effort to enhance safety and reliability.

In marketing initiatives, JR-West launched the EX-IC service for the Sanyo Shinkansen in August 2009 to enhance convenience, as well as continued to promote use of the Sanyo Shinkansen by operating additional trains, and implementing a proactive campaign to highlight the comfort of the N700 Series, along with the convenience and price advantages of the Express Reservation system. For conventional lines, in December 2009 we began negotiations with Surutto Kansai Association for an integrated service utilizing IC card (smart card) train passes, and reached an agreement to improve the convenience of railways through coordination. Also, amid the economic decline and the implementation of deep discounts for expressway tolls, JR-West actively worked to sell special promotional packages, such as the Kodama Reserved Seat Return Ticket, and West Japan Pass. We also worked in cooperation with local governments, travel agents and other JR companies to stimulate demand for tourism, such as through the Aitai Hyogo Destination Campaign, and the Japanese Beauty Hokuriku Campaign. In addition, in July 2009 JR-West merged two consolidated subsidiaries in the rental car business, creating a structure for more efficient secondary access from railways.

For customer service initiatives, in consideration of social trends such as the prevention of exposure to secondhand smoke, in June 2009 JR-West banned smoking on all limited express trains on conventional lines, and in July banned smoking on all platforms on conventional lines in the Kyoto-Osaka-Kobe area. We also continued to expand the system of screens that display current information on train operations during emergencies or other disruptions.

In environmental issues, JR-West implemented the "Think and Act Eco" initiative to encourage

every employee to reconsider their lifestyles and work from an environmental perspective. Also, in November 2009 we launched the "Eco Life Point" service and other Groupwide measures incorporating customer participation.

In ferry services (the Miyajima Line), JR-West established a subsidiary in February 2009 in order to put in place a structure that allows for timely and appropriate decision-making, as well as to enhance safety and develop detailed marketing measures. The ferry service was transferred to this subsidiary, the JR West Miyajima Ferry Company, in April 2009.

In bus services, amid a highly competitive environment marked by deep discounts on expressway tolls and other factors, JR-West worked to enhance customer convenience with measures including timetable revisions, additional bus stops, and flexible pricing schemes.

However, as a result of the sharp decline in the Japanese economy, discounted expressway tolls, the spread of the new influenza virus in the first half of the subject fiscal year and other factors, operating revenues for the Transportation Operations segment decreased 6.9% from the same period of the previous fiscal year, to ¥797.4 billion, with operating income down 49.3%, to ¥45.2 billion.

Sales of Goods and Food Services

For the new department store in the New North Building of Osaka Station, JR-West began making preparations for opening centered on the development planning office for the facility's main business operator West Japan Railway Isetan Ltd. We also continued to work to make stations more attractive, such as by opening a "gift market" along with other shops and restaurants as part of Hakata Station's renovation. The commercial facility Eki Marché Takarazuka was opened in Takarazuka Station with the completion of an overhead connection bridge.

However, as a result of the sharp decline in the Japanese economy, the spread of the new influenza virus in the first half of the subject fiscal year and other factors, operating revenues in the Sales of Goods and Food Services segment declined 6.2% from the same period of the previous fiscal year, to ¥201.9 billion, with operating income down 33.6% to ¥3.1 billion.

Real Estate Business

JR-West worked to develop station premises and surrounding areas, including full renovation of "Station Plaza Tennoji" in Tennoji Station. We also opened the new "Wakayama Mio" shopping center in the Wakayama Station building, as well as the JR Sumakaihinkoen Station West NK Building, a structure on the west side of Sumakaihinkoen Station that includes a fitness club and other facilities.

We also moved steadily forward with the plan for the Osaka Station Development Project, including making progress with the renovation of Osaka Station and work to develop the New North Building, as well as expansion of the ACTY Osaka building. In addition, we actively developed condominium apartments on land formerly used for housing for company employees.

In April 2009 JR-West merged two consolidated subsidiaries in the Okayama area that operate a shopping center and develop property under elevated tracks, with the aim of strengthening their competitiveness and overall capabilities.

As a result, operating revenues for the Real Estate segment declined 0.3% from the previous fiscal year, to ¥70.9 billion, with operating income down 0.5%, to ¥22.5 billion.

Other Businesses

In hotel operations, JR-West worked to expand sales through such measures as renovation of guest facilities, and hosting various events.

In travel agency operations, JR-West worked to expand sales utilizing its internet sales system.

For the J-West Card credit card, JR-West worked to increase the number of cardholders through such measures as issuing additional cards to family members. For the ICOCA e-money service, we began offering interoperability with JR Central's TOICA service, and expanded the network of stores around town where the service can be used, such as major convenience store chains and restaurants.

However, as a result of the sharp decline in the Japanese economy, the spread of the new influenza virus in the first half of the subject fiscal year and other factors, operating revenues in the Other Businesses segment declined 9.7% from the same period of the previous fiscal year to ¥119.6 billion, with operating income on a par with the previous period at ¥6.7 billion.

(3) Qualitative Information on Consolidated Forecasts

The business environment for JR-West is expected to remain difficult due to the sluggish Japanese economy, along with other factors such as the deep discounts on expressway tolls, and the planned elimination of tolls on some expressways. In response to these circumstances, JR-West will implement sales measures responsive to changes in the business environment in an effort to secure earnings, and under the direction of the Corporate Revival Headquarters established in March 2009, work to strengthen the management structure through revision to the entire operational framework, while maintaining and enhancing safety. Further, in accordance with the JR-West Group Medium-Term Management Plan, we will work to establish a brand of trust and reliability, and to steadily implement business strategies to achieve sustainable development, including offering of direct through-service operations on the Sanyo and Kyushu Shinkansen lines, moving forward with the Osaka Station Development Project and enhancing the value of areas along rail lines through the coordinated effort of the railway and business creation divisions, in an effort to enhance medium- to long-term corporate value.

Consolidated Forecasts for the Year Ending March 31, 2011

Operating revenues:	¥1,193.0 billion	(up 0.2% YoY)
Operating income:	¥78.0 billion	(up 1.9% YoY)
Recurring profit:	¥49.0 billion	(up 1.9% YoY)
Net income:	¥28.0 billion	(up 12.6% YoY)

Note: Forecasts are based on certain assumptions considered reasonable at the present time, and are subject to change.

2. Qualitative Information on the Consolidated Financial Position

(1) Cash Flows From Operating Activities

Cash provided by operating activities amounted to ¥161.3 billion, a decline of ¥17.5 billion from the same period of the previous fiscal year. This was due mainly to the decline in income before income taxes and minority interests, offsetting expenditures for payment of the decline in income taxes paid.

(2) Cash Flows From Investing Activities

Cash used in investing activities amounted to ¥208.7 billion, an increase of ¥36.1 billion from the same period of the previous fiscal year. This was due mainly to increases in expenditures for acquisition of property, plant and equipment.

(3) Cash Flows From Financing Activities

Cash provided by financing activities amounted to ¥54.6 billion. This was due mainly to increases in proceeds from the issuance of bonds.

As a result, cash and cash equivalents at the end of the subject period totaled ¥51.0 billion, an increase of ¥9.9 billion from the end of the previous fiscal year (March 31, 2009).

(Reference) Cash Flow Indicators

Years ended March 31

	2006	2007	2008	2009	2010
Equity ratio (%)	23.9	25.3	25.9	26.7	26.3
Equity ratio, based on market value (%)	42.2	45.3	35.2	24.5	24.5
Interest-bearing debt to cash flow ratio (Times)	6.1	5.1	4.2	5.2	6.3
Interest coverage ratio (Times)	3.4	3.6	3.9	3.6	2.2

Notes:

Equity ratio: shareholders' equity/ total assets

Market-based rate of equity ratio: total market capitalization/ total assets

Interest-bearing debt to cash flow ratio: interest-bearing debt/ operating cash flows

Interest coverage ratio: (operating income + interest & dividend income)/ interest expense

Notes:

- 1. All of the figures in the above table were calculated on a consolidated basis.
- Total market capitalization was calculated by multiplying the closing stock price at the end of the term by the total amount of outstanding stock at the end of the term (excluding treasury stock).
- 3. Cash flow is defined as operating cash flow.
- 4. Interest-bearing debt is defined as interest-bearing debt of long-term debt and payables.

3. Basic Policy Regarding Distribution of Earnings

JR-West's basic policy, in consideration of the steady improvement in the stability and soundness of its finances, is to place priority on the strengthening and expansion of its business foundation with sufficient investments for improved safety and growth, and enhance the corporate value of the Company.

Regarding the specific policy for dividends, JR-West considers it important to maintain and improve its return on capital, and to provide sufficient shareholder returns in accordance with shareholders' equity and the status of long-term debt. On the premise that current project achieve results as planned, from fiscal 2013 (ending March 31, 2013) we plan to achieve 3% of consolidated dividend on equity (DOE).

For the subject fiscal year, JR-West plans to pay a dividend of ¥7,000 per share, consisting of the ¥3,500 per share interim dividend already paid, and a year-end dividend of ¥3,500 per share.

2. MANAGEMENT POLICIES

On April 25, 2005, an extremely serious accident between Tsukaguchi and Amagasaki stations on the Fukuchiyama Line resulted in 106 fatalities and injuries to more than 500 passengers.

We pray for all the victims of the accident and offer our sincerest apologies to their bereaved families. We would also like to express our deepest sympathies and sincerest apologies to the injured, and hope they recover as soon as possible. We further offer deep apologies to passengers, shareholders and local residents for the excessive strain and trouble that we have caused.

We pledge never to forget this accident, and to remain conscious of our responsibility for protecting the truly precious lives of our customers. We also persistently act on the basis of safety first, and are working to build a railway that assures our customers of safety and reliability, in accordance with our Corporate Philosophy and Safety Charter.

1. Basic Management Policies

The JR-West Group, concentrating on its core business of railway operations, will work to establish a corporate culture that places a top priority on safety, regain trust as quickly as possible, and pursue sustainable development as a corporate group.

Specifically, these "three pillars of management" are to 1) support the bereaved families and all those who were victims of the accident, 2) pursue safety improvement measures, and 3) reform the corporate culture. We will make a concerted effort as a company to put the organization on the path to revitalization as quickly as possible, and regain trust.

Despite the lack of transparency in the outlook for the business environment, JR-West has continued to work to improve its corporate value. In accordance with the Corporate Philosophy and Safety Charter, and while maintaining a foundation of prioritizing safety and accurately assessing market trends, we have implemented strategic and timely measures that allow us to provide high-quality services and products that induce customers to continue choosing JR-West with confidence.

2. Medium-Term Management Strategies

The JR-West Group announced its "JR-West Group's Medium-Term Management Plan 2008-2012" in May 2008, formulated from the standpoint of realizing our Corporate Philosophy, the common values that we as a company must strive to achieve. In addition to the ultimate goal of the Basic Safety Plan formulated and announced in April 2008 to "Build a corporate system to ensure no accidents to produce causalities among our customers and no serious labor accidents to our employees", JR-West has established three main management goals for the period of this plan: 1) Establish a brand of safety and reliability; 2) Pursue business strategies for sustainable growth; and 3) Foster a management vision from a long-term perspective. Through its corporate activities aimed at achieving these goals, JR-West will meet the expectations of all stakeholders, including its customers, shareholders, its employees and their families, as well as local communities and society at large.

3. Management Issues

JR-West is redoubling its efforts to establish a corporate culture that places top priority on safety, and places the highest management priority on regaining the trust of customers and society lost as a result of the Fukuchiyama Line accident. Building on a foundation of providing a safe and reliable, high-quality transport service, JR-West recognizes that it must, as a corporate group, strive to provide a beneficial service to society, and achieve sustainable growth into the future.

In consideration of the serious compliance issues raised in the course of the investigation of the Fukuchiyama Line accident conducted by the Aircraft and Railway Accidents Investigation Commission, JR-West will implement measures to prevent a reoccurrence including ensuring corporate ethics and strengthening corporate governance, and will further enhance the measures outlined in the three pillars of management taken up to now to revitalize the company.

Being responsive to the bereaved families and all those who suffered as a result of the Fukuchiyama Line accident is one of our highest priorities. We will deal with them honestly, listen carefully to their opinions and requests, and strive to ensure that they accept the sincerity of our response.

For measures to improve safety, JR-West will steadily move forward with its Basic Safety Plan to achieve the goal of "Build a corporate system to ensure no accidents to produce causalities among our customers and no serious labor accidents to our employees." We will also further enhance our safety management structure in line with the Railway Safety Management Manual.

Specifically, along with sharing information on risks and implementing effective countermeasures, we will work to establish safety management based on risk assessments through lateral dissemination of recommended measures for risk assessments, and will implement various measures necessary to establish a foundation for safety, including improving communication, strengthening ties among Group and associated companies, and securing and developing human resources. We will also make regular investments to maintain and renovate facilities, as well as implement measures aimed at installing ATS systems, preventing accidents at crossings, enhancing safety on platforms, and preventing accidents during maintenance work. Further, we will continue to implement measures to ensure that we do not forget the Fukuchiyama Line accident, and enhance the effectiveness of teaching the lessons learned from the accident during training session conducted at the Railway Safety Education Center.

For the reform of the corporate culture, JR-West will work to change the corporate atmosphere and revitalize the company, redoubling its efforts toward individual proactive thinking and action in order to ensure that each employee fully understands how his or her job is linked to the world at large, and to realize our corporate philosophy.

In the railway business, amid a competitive environment marked by such factors as a tight economy, deep discounts on expressway tolls, elimination of fees on some expressways, and expanded number of landing slots at Haneda Airport, in anticipate of the full opening of the Kyushu Shinkansen in spring 2011 JR-West will provide highly convenient timetables, product structures and sales channels, particularly including direct through-service operation on the Sanyo and Kyushu Shinkansen. We will also step up advertising campaigns to highlight the convenience and cost advantages of the Express Reservation system and Express IC (EX-IC) Service, as well as develop the J-WEST Premiere Program and EX-Reservation Corporate Service systems in order to increase use of the Sanyo Shinkansen and other lines. JR-West will create demand for tourism by utilizing destination campaigns, the DISCOVER WEST Campaign and other promotions, and work in cooperation with local governments and travel agents to generate tourism ideas, as well as design and promote travel packages. We will also provide interoperability between ICOCA and JR Kyushu's SUGOCA service, and expand IC card (smart card) alliances with private railways in the Kyoto-Osaka-Kobe area in order to provide highly convenient service. Further, JR-West will proactively implement measures to make stations and trains more user-friendly and enhance customer satisfaction, including bolstering the overall level of service, from ticket windows and other station and train services, and making stations more accessible through such measures as installation of "barrier free" facilities in conjunction with local governments and other organizations.

In the areas of sales of goods and food services and real estate, JR-West will implement measures to enhance the value of our railway belts, with the railway division working in cooperation with local governments and communities to maximize asset efficiency. Further, from the standpoint of enhancing the potential of stations and surrounding areas, and stimulating growth in areas in between, we will seek to create districts with full offerings in stations and surrounding areas that provide ample convenience, and are attractive places to live. For the area encompassing Kyoto, Osaka and Kobe in particular, we will pursue specific measures based on market trends and other aspects of each rail belt. We will also move steadily forward with the Osaka Station Development Project, anticipating completion in the spring of 2011. We will work to increase the number of J-WEST Card cardholders, and work to enhance convenience for use in conjunction with the railway service, including allowing interoperability between the ICOCA e-money service and JR Kyushu's SUGOCA, and expanding the number of stores where the service can be used.

With regard to the pursuit of corporate social responsibility (CSR), JR-West will continue to move forward with efforts centered on its CSR Promotion Committee. We will also further strengthen internal control functions, including working to establish corporate ethics in line with the deliberations and other recommendations of the Corporate Ethics Committee that acts as a consultative body for the Board of Directors, and will take steps for appropriate management of risks under the guidance of the Crisis Management Committee. For global environmental issues, JR-West will introduce energy efficient rolling stock and high-efficiency equipment and promote the "Eco Life Point" service as part of a proactive effort to reduce CO_2 emission, as well as implement throughout the entire JR-West Group the "Think and Act Eco" initiative to encourage all employees to think about and act to protect

the global environment. We will also work through the activities of the JR West Anshin Foundation established in the wake of the Fukuchiyama Line accident to pursue measures beneficial to the establishment of a sustainable, stable society.

The business environment for JR-West is expected to remain extremely difficult due to the sluggish Japanese economy, along with other factors such as the deep discounts on expressway tolls. In response to these circumstances, JR-West will implement sales measures responsive to changes in the business environment in an effort to secure earnings, and under the direction of the Corporate Revival Headquarters established in March 2009, work to improve management in terms of both income and expenditure with measure to strengthen the management structure through revision to the entire operational framework, while maintaining and enhancing safety. We will also make a concerted effort to derive the maximum benefit from direct through-service operations on the Sanyo and Kyushu Shinkansen to commence in spring 2011, and the opening of the Osaka Station development project. Further, in accordance with the JR-West Group Medium-Term Management Plan, we will work to establish a brand of trust and reliability, and to steadily implement business strategies to achieve sustainable development, including establishing the superiority of the Sanyo Shinkansen, and enhancing the value of our railway belts through the coordinated effort of the railway and business creation divisions, in an effort to enhance medium- to long-term corporate value.

Cash and cash equivalents at the end of the period	41,184	51,084

4. SIGNIFICANT CHANGES FUNDAMENTAL TO THE PREPARATION OF FINANCIAL STATEMENTS

1. Change in Standard for Recognizing Revenues and Costs of Completed Construction Projects In its accounting standard for recognizing revenues and costs of construction contracts, from the subject fiscal year, JR-West has applied Accounting Standards Board of Japan (ASBJ) Statement No. 15 (December 27, 2007), "Accounting Standard for Construction Contracts" and ASBJ Guidance No. 18 (December 27, 2007), "Guidance on Accounting Standard for Construction Contracts." As a result, in its calculation of the percentage of completion at the end of the subject fiscal year for construction contracts that began from April 1, 2009, JR-West has used the percentage-of-completion method for construction projects for which the percentage of completion can be reliably estimated (estimates of the percentage of completion are made mainly by calculating the percentage of the cost incurred to the estimated total cost), and the completed-contract method for other construction projects.

The impact on the consolidated financial statements as a result of this change is minimal.

2. Change in Valuation Standard for Marketable Securities

From the subject fiscal year, JR-West has applied "Accounting Standard for Financial Instruments" (ASBJ Statement No. 10, revised March 30, 2008). Since it is possible to estimate the future cash flow of available-for-sale securities without a market price, the value used for these securities is the present value of the future cash flow discounted at an appropriate rate plus the yield spread on government bonds.

The impact on consolidated financial statements as a result of this change is minimal.

3. Change in Calculation Method for Retirement Benefits

From the subject fiscal year, JR-West has applied "Partial Amendments to 'Accounting Standard for Retirement Benefits' (Part3)" (ASBJ Statement No. 19, July 31, 2008).

There was no variance in calculation as a result of this change, and no impact on consolidated financial statements.

CONSOLIDATED FINANCIAL STATEMENTS OF CHANGES IN NET ASSETS

1. Kind and number of shares outstanding

	The table and the table of the table and the table and the table and table a				
	Kind of shares	Number of shares at	Year ended March 31, 2010		Number of shares at

5. RETIREMENT BENEFITS FOR EMPLOYEES

1. Overview of the Retirement Benefits System Adopted by the Company

The Company and its consolidated subsidiaries have established defined benefit plans, consisting of a qualified pension plan and a retirement lump-sum payment plan. Certain consolidated subsidiaries have a funded defined contribution pension plan administered by a government agency. In addition, premium severance pay may be available for retiring employees.

2. Retirement Benefit Obligation (March 31, 2010)

	Millions of yen
(1) Retirement benefit obligation	(365,596)
(2) Plan assets at fair value	9,313
(3) Unfunded retirement benefit obligation [(1) + (2)]	(356,282)
(4) Unrecognized net retirement benefit obligation at transition	4,906
(5) Unrecognized actuarial loss	28,635
(6) Unrecognized prior service cost	(1,541)
(7) Net retirement benefit obligation [(3) + (4) + (5) + (6)]	(324,281)
(8) Prepaid pension cost	519
(9) Accrued retirement benefits [(7) – (8)] (Note)	(324,801)

Note: Some subsidiaries adopt the simplified method in calculating retirement benefit obligations.

3. Retirement Benefit Expenses (Year ended March 31, 2010)

	Millions of yen
(1) Service cost	15,189
(2) Interest cost	7,391
(3) Expected return on plan assets	(174)
(4) Amortization of net retirement benefit obligation at transition	31,462
(5) Amortization of actuarial loss	7,530
(6) Amortization of prior service cost	82
(7) Amortization of transition from the simplified method to the principle method	740
(8) Total [(1) + (2) + (3) + (4) + (5) + (6)+(7)]	62,220

Note: Retirement benefit expenses of consolidated subsidiaries which adopt the simplified method are stated in (1) Service cost.

4. Items related to Basis for Calculation of Retirement Benefit Obligation

(1) Method allocating projected retirement benefits over period
 (2) Discount rates
 (3) Expected rate of return on plan assets
 (4) Amortization period of net obligation at transition

Notes: 1. Fractional sums less than ¥1 million have been omitted.

- Method of defining business segments: With the standard breakdown of Japanese manufacturers as a base, business segments have been determined in a way that shows as precisely and accurately as possible the actual diversity of present business conditions.
- 3. Main activities of business segments

Transportation: railways, ferries, buses

Sales of goods and food services: department store, sales of goods, food and beverages, wholesale of various goods, etc.

Real estate business: brokerage and leasing of real estate, operation of shopping center

Other: hotels, travel services, rental of goods, construction, etc.

4. The company-wide assets included in "Eliminations and Intergroup" consist mainly of the Company's surplus funds (cash and cash equivalents), and deferred tax assets.

Year ended March 31, 2009: ¥161,333 million

Year ended March 31, 2010: ¥181,318 million

8. NOTES REGARDING FINANCIAL INSTRUMENTS

Items related to the market value of financial instruments

The following chart shows amounts for items recorded in the consolidated balance sheets at March 31, 2010 (the consolidated settlement date for the subject fiscal year), along with their market value and the variance. Items for which determining the market value is recognized as being extremely difficult are not included in the chart. (See Note 2)

Millions of yen

	Amount recorded on balance sheets	Market value	Variance
(1) Cash	51,314	51,314	_
(2) Notes and accounts receivable-trade	14,282	14,282	_
(3) Railway fares receivable	22,714	22,714	_
(4) Accounts receivable	42,038	42,038	
(5) Investments in securities			
Available-for-sale securities	8,543	8,543	_
(6) Notes and accounts payable-trade	[47,999]	[47,999]	_
(7) Short-term loans	[12,932]	[12,932]	_
(8) Accounts payable	[102,385]	[102,385]	_
(9) Railway deposits received	[2,117]	[2,117]	_
(10) Deposits received	[50,033]	[50,033]	_
(11) Bonds included in current portion of bonds	[384,968]	[404,502]	[19,534]
(12) Long-term debt included in current portion of			
long-term debt	[294,249]	[299,927]	[5,678]
(13) Long-term payables for acquisition of railway			
properties included in current portion of payables for			
acquisition of railway properties	[359,494]	[491,197]	[131,702]
(14) Long-term accounts payable included in current			
portion of long-term accounts payable	[253]	[271]	[18]
(15) Derivatives	[231]	[231]	_

^{*} Figures in bracket [] are stated in liabilities.

- Note 1: Items concerning the calculation method of the market value of financial instruments, as well as marketable securities and derivatives.
 - (1) Cash; (2) Notes and accounts receivable-trade; (3) Railway fares receivable; (4) Accounts receivable

The book value is used for these items, because the market value is nearly equal to the book value as a result of their short settlement periods.

(5) Investments in securities

The market value of investment securities is determined by the price of the stock traded on an exchange. For bonds, the value is calculated from the present value of the future cash flow discounted at an appropriate rate plus the yield spread on government bonds.

(6) Notes and accounts payable-trade; (7) Short-term loans; (8) Accounts payable; (9) Railway deposits received; (10) Deposits received

The book value is used for these items, because the market value is nearly equal to the book value as a result of their short settlement periods.

(11) Bonds included in current portion of bonds

The market value of bonds issued by the Company is calculated based on the market price.

(12) Long-term debt included in current portion of long-term debt; (14) Long-term accounts payable included in current portion of long-term accounts payable

The market value of these items is calculated from the present value of the total principal and interest discounted at a rate supposing newly conducted similar borrowing.

(13) Long-term payables for acquisition of railway properties included in current portion of payables for acquisition of railway properties

The market value of long-term payables for acquisition of railway properties, due to the difficulty of refinancing with methods similar to the debt acquired based on relevant laws, is calculated based on the present value of the total principal and interest discounted at a rate supposing newly issued similar bonds.

(15) Derivatives

The market value of derivatives is based on the market price and other information shown by financial institutions.

Note 2: Financial instruments for which determining the market value is recognized as being extremely difficult

Millions of yen

	Amount recorded on consolidated balance sheets
Investment securities	
Available-for-sale securities	
Equity securities	2,276
Other	44

These items have no market value, and it is impossible to estimate their future cash flow. Because determining the market value is recognized as being extremely difficult, they are not included in "(5) Investments in securities – Available-for-sale securities."

9. NOTES REGARDING LEASED AND OTHER REAL ESTATE PROPERTIES

- Items concerning the status of leased and other real estate properties
 JR-West and certain subsidiaries hold real estate properties for lease, including office buildings, commercial facilities with land and residential buildings, in Osaka and other regions.
- 2. Items concerning the market value of leased and other real estate properties

Millions of yen

	-
Amount recorded in consolidated	Market value
balance sheet	
111,110	203,145

- Note 1: The amount recorded on the consolidated balance sheet is the acquisition amount less accumulated depreciation and impairment.
- Note 2: The market value of major properties at the end of the subject fiscal year is calculated based on real-estate appraisal standards. The market value of other properties, because a certain portion of the assessed value can be considered to be properly reflected in the market price, is recorded as the relevant assessed value or amount recorded on the balance sheet.
